Re: Major Plan Amendment – 45 day review

An error was discovered on the May 18, 2010 letter transmitting the 45-day review documents for the Shingle Creek/West Mississippi Watershed Management Commissions' proposed major plan amendment to their Second Generation Watershed Management Plan.

In the second paragraph, the fourth sentence should read, *The proposed amendment would adopt a revision to the Commissions' joint Capital Improvement Program to add seven projects, including two projects in 2010.*

That error was repeated in the draft May 13, 2010 public hearing minutes in paragraph III.

I apologize for this confusion and ask that you replace the previously transmitted letter and minutes with the attached copies. Thank you.
